

# Smarter Software. Engineered Here.

Insurance companies need more from the applications and systems that drive their core business, such as Underwriting, Claims Processing, and Policy Management. VividCloud can automate manual processes, integrate applications, open up information silos, and replace legacy technology.

## Industry Challenges We Help Solve

### Underwriting Operations

With a lack of pre-screening capabilities and the inability to integrate with new data sources, most underwriting systems contribute to process delays and represent the root cause of inefficiencies. [Read More](#)

### Claims

Challenges with data collection, adjudication, reserve accuracy, compliance, and document management can result in increased customer frustration and unwanted attention from regulators. [Read More](#)

### Policy Administration

Oftentimes, legacy policy administration systems don't support sufficient data collection or customer self-service capabilities. This can lead to inaccuracies, rework, and complaints from customers [Read More](#)

### Legacy Systems

Many legacy systems are outdated, difficult to maintain, and expensive to run. Because of this, they aren't flexible enough to support new products, rates, price packages, and complex workflows. [Read More](#)

**In the insurance industry, inefficient systems and the lack of integration are to blame for mounting workloads. We are uniquely equipped to help our clients overcome obstacles.**

## 10 Ways VividCloud Can Help Right Now

**ACORD**  
Implementing ACORD across organizations as a common data standard.

**Rating Systems Integration**  
Integrating applications with internal and external rating systems including quoting and binding.

**Document Generation**  
Automating document generation to enhance data quality.

**Integrating Systems**  
Integrate with internal and external systems including claims and underwriting.

**InsurTech**  
Bring the transformational technologies used by InsurTechs to modernize legacy applications and platforms.

**Web and Mobile Applications**  
Delivering web and mobile applications that enhance and deepen engagement with your customers.

**Automating Workflows**  
Replace manual processes to accelerate operations through events, rules, and notifications.

**Modernizing Legacy Applications**  
Enable and implement contemporary technologies by breaking up monolithic applications using Containerization, Serverless Technology, empowering your development team with CI/CD pipelines,

**Accelerating Cloud Migration**  
Migrating applications from on-premises environments to the cloud, delivering operational efficiency, eliminating costly, inflexible, and monolithic infrastructure, and opening the door for transformational technologies such as data analytics, machine learning, and artificial intelligence.

**3rd Party Integration**  
Integrating your applications with third-party data providers such as LexisNexis, ISO, Verisk.

# Repeatable Modernization Process

## Assessment

## Planning

## Execution

## Deployment

Gather Business and Known Obejectives	Move to Cloud Native	Move to Managed Analytics	Build Project Backlog	Deploy Modernized Application & Platform
Technical Assessment of Software	Move to Containers	Move to Modern DevSecOps	Setup AWS Landing Zones	Migrate Existing Customers
Security and Regulatory Requirement Assessment	Move to Serverless	Integrating Security into DevOps Workflows	Establish CI/CD Pipelines	Monitor and Observe
Conduct Cost Benefit Analysis	Move to Manages Databases	Deliverables From This Phase	Customer Migration Strategy	Choose Best AWS Cost Optimized Model
	Move to Open Source		Application Development by Epic	

# Our Services

We're a proud AWS Advanced Tier Partner.

As a proven, reliable consulting partner for your complex and critical AWS projects, we are committed to learning and growing along with the dynamic, ever-changing AWS platform. With VividCloud, you'll tap into decades of combined cloud and IoT expertise, all backed by the deep experience and vast resources of AWS, to ensure that every project is a success.

## Cloud software engineering for businesses that need it built right, right now. Guaranteed.

When time is the enemy and you need a partner who cares about your business' success as much as you do, VividCloud delivers. To make your choice easier, we offer a no-risk 30-day guarantee to all new clients.

Through our partnership with AWS, we bring the best the platform has to offer to all our work.
